

FHG - Fill Height Gauge

Simple and useful measuring tool for fill height measurement. It's designed for all size bottles. Gauge may be preset in inches or millimeters to check fill height level on production line or may be used to measure exact fill point of bottle and then compared to standard. Rule may be raised or lowered to compensate for the thickness of various crown caps.

Technical specification:

- Measuring range: 0 to 150 mm
- Graduation: mm / inch
