

AS-1 Auto Seamer (laboratory type)

AT2E Auto Seamer is for automatic sealing, enables the users to do lab tests. Such as, adjusting some technique, enhancing the products quality, test the empty cans and lids, to put the temperature recorder into the can before tracking the temperature, and so on.

It is easy operation and convenient for lab tests, fast, easy and high efficiency.

Characteristic

- Small size, can be a lab desktop using.
- Easy operation, just place the can onto the holder, push down the handle, the motor will drive to finish the seaming itself.
- The cam curve automatically controls the matching between the rolling cans and compaction of the roller, so that to get the perfect seam structure.
- The seam structure is adjustable, operator can adjust the body hook length, overlap rate, seam thickness, etc.,
- The whole seaming process takes only about 15 seconds.

Specification:

- Sample can dia. : 200 - 404 (diameter 50 - 108mm)
- Max. can height : 127 mm (higher by ordering)
- Sample type : beverage and food cans
(The seamer is applicable to only one (1) type of can and end when ex-factory, should multi-can types be applied, please indicate when enquiring.)
- Power supply : 230V/50Hz
- Dimensions : 390 x 350 x 800 mm
- Weight : 35 kg
