

# SSC-1 Simple Section Cutter

- For PET bottle section weight analysis

The "SSC-1" Simple Section Cutter is a simple tool for section cutting of a plastic bottle. It provides a fast and repeatable cutting process for section weight control. Operator just needs to inset the bottle to the cutter, press the lever to let knife piece into the cut position and twist the bottle. Then the demanded section can be obtained.

Please provide the bottle drawing and demanded section dimension upon order.

### Advantages:

- Easy and simple to use
- High repeatability and accurate cutting
- Safe and avoid toxic gas
- Cost saving of maintenance comparing to electrical model
- Portable device
